

## Customer Benefits of this Partnership

- Elite Technology Solutions has a premier partnership with Simple Helix and can help engineer and plan your organization's move into a secure, and redundant Tier III Data Center right here in Huntsville AL...
- Given our exclusive relationship, we can expedite such migrations and help you with things such as:
  - Colocation
  - Enterprise Network Solutions
  - Fiber Solutions for Business
  - Data Storage, Protection & Management
  - Disaster Recovery
  - Cloud Hosting and Server Virtualization
  - Server Management and Monitoring

What are the benefits of having ETS move your IT equipment to a Tier 3 Data Center like Simple Helix?

- Colocation data centers have fully redundant network connections ensuring business critical applications always run uninterrupted.
- Data centers have top-notch network security, including the latest firewalls / IDS systems to detect and prevent unauthorized access.
- Colocation data centers offer power redundancy through a combination of multiple power grids, diesel power generators, double battery backup systems and excellent maintenance practices.
- Colocation centers provide customers with the flexibility to burst to higher bandwidth levels to accommodate their traffic demand without having to make repeat capital investments. Since data spikes are distributed over time across numerous users, bandwidth costs are significantly reduced.
- Colocation allows you to expand your infrastructure to fit the needs of your company's growth without having to take on capital expenditures. If you're company grows, your IT infrastructure can expand to support it quickly and with less investment.
- If your company is looking at cloud computing in the near future, colocation provides a smooth transition by allowing you to move your equipment to an offsite facility with increased capacity and performance to support business needs while ensuring a smooth cloud transition.

Compliance and Standards

- PCI DSS
- SSAE 16 (SOC 1)
- NIST 800-171
